

GW Agriculture™ / Wholistic™ Agricultural Science  
**"NOTHING'S GREENER"™**

Dear Beekeeper,

In 1923, Austrian physician and philosopher Rudolf Steiner, the man who in 1916 predicted Mad Cow Disease, predicted that honeybees would be "extinct" in 80-100 years. That day is upon us.

The agent of this catastrophe is **CCD - Colony Collapse Disorder**. It should be called Colony Collapse Disaster.

Commercial beekeepers are losing 50-90% of their honeybee hives. In the wild, the number runs around 80% and is more or less the same for all pollinators. In one province in China, honeybees are already extinct. Time is running out.

A year later, in 1924, Steiner provided the insight and the scientific foundations to create a science to explain it, prevent it and stop it. All it took was to get that information into the right hands with the right technology.

Using advanced agricultural science and the ultra high technology of Wholistic™ Agriculture, the GW Agriculture company now has the answer to this problem: The CCD Solution™.

Wholistic™ Agricultural Science is a new science, sixteen years and millions of dollars in the making. Our work goes beyond traditional science that, for the most part, merely observes and describes what Nature does. Working from a deep understanding of the Laws of Nature, we challenged those observations and then went a step further by providing insights into the mechanisms of the natural world, delineating **WHY** Nature does what it does.

Wholistic™ Agriculture's "CCD Solution" gives reason to be optimistic about the future of the honeybee. We have written a carefully reasoned, easy to read, scientific explanation for CCD in a 26 page booklet. We include step-by-step "how to" instructions to prevent CCD and fix it if you have it.

One beekeeper who tried the CCD Solution reported this:

"Knowing we had problems with our bees, I was not feeling optimistic but I sprayed the Wholistic™ Agriculture bee sequence on our hives three weeks ago. Yesterday we opened up the hives to have a look. ALL the hives looked strong, were building new comb and had plenty of brood. The activity level was high, just what you like to see this time of year." - Jacqueline Freeman, Battle Ground, WA - 4/28/08

The products in The CCD Solution Kit contain no chemicals, poisons or GMO material. They are safe, easy to apply and have both rapid and long-lasting effects. Simply put, they work.
